

BIOFERTIVA

PROM

Organic Fertiliser

10 to 14% Carbon . Sourced From Organic Manure

A carbon-rich organic fertiliser that improves soil health, enhances microbial activity, and supports strong root development for better yields.

100% ORGANIC

PHOSPHATE RICH

CARBON ENRICHED

SAFE & ECO-FRIENDLY

THE PRODUCT

Carbon-Rich Power for Living Soil

PROM, short for Phosphate Rich Organic Manure, is a premium organic fertiliser sourced from natural manure. It restores soil organic matter, feeds beneficial microbes, and delivers essential phosphorus in a slow-release, plant-available form.

P	R	OM
PHOSPHORUS	ORGANIC CARBON	ORGANIC MATTER
Slow-release phosphorus for strong roots and steady growth	Restores soil life and long-term fertility from within	Builds structure, water retention, and resilient soils

10-14% CARBON • High Quality Organic Carbon

Enhances soil organic matter, improves fertility, and supports long-term soil sustainability. The cornerstone of regenerative farming.

KEY BENEFITS

Why Growers Choose PROM

✓ Improves Soil Health Restores natural balance and revitalises depleted soils with organic nutrients.	✓ Promotes Strong Roots Phosphorus-rich formula encourages deep, well-developed root systems.
✓ Enhances Microbial Activity Feeds beneficial soil microbes that drive natural nutrient cycling.	✓ Improves Soil Structure Builds aggregate stability, water retention, and aeration over time.

Recommended Dosage

PROM adapts to a wide range of crops and farming systems. Use the table below as a starting point, then fine-tune to your soil and crop needs with help from our agronomy team.

CROP TYPE	APPLICATION RATE
Field Crops	250 to 500 kg / acre
Horticultural Crops	500 to 1000 kg / acre
Plantation Crops	1 to 2 kg / plant
Nursery / Pot Culture	250 to 500 g / plant

ⓘ Dosage may vary depending on soil type and crop requirement. Contact our team for tailored guidance.

Ideal For All Crops

 Cereals

 Pulses

 Oilseeds

 Fruits

 Vegetables

 Plantations
